## Education

---

National University of Sciences and Technology, Bachelors in Computer Engineering Sept 2017 – Jul 2021

## Experience

---

Project Delivery Manager (Remote), Exhortek (Australia) Sep 2025 – Present

- **Owned end-to-end delivery** of Microsoft Dynamics 365 CRM and ERP implementations across multiple client projects.
- **Led cross-functional teams**, translating business requirements into deployable solutions and **assigning/tracking work using Azure Boards**.
- **Managed delivery cadence**, stakeholder alignment, and go-live readiness to ensure successful launches.
- Ensured user adoption through structured handover and post-launch support.

Project Manager - SAP Integrations, The Working Town (Pakistan) Jul 2025 – Present

- **Owned delivery of SAP integration projects** across multiple industries and regions, including Europe, the U.S., Brazil, and Pakistan.
- **Coordinated technical teams and business stakeholders**, optimizing workflows and driving strong end-user adoption.
- **Delivered core SAP modules** (SD, C4C, FICO, PLM, HCM), improving operational efficiency and process automation.
- **Standardized delivery workflows**, introducing structured project management processes to improve cross-team collaboration.

Technical Project Manager (Remote), Powerhouse Technologies (USA) Jul 2025 – Dec 2025

- **Owned delivery** of Powerhouse's official website from scope through launch, shipping **ahead of schedule**.
- **Owned delivery of an internal SaaS product** built on **Retool**, managing product scope, sprint execution, and releases.
- **Managed sprints using Linear**, coordinating cross-functional teams across design, development, and QA.
- **Led internal automation initiatives** to streamline legal workflows and ensure **production-ready systems**.

Technical Project Manager, Pakistan Armed Forces June 2022 – May 2025

- **Led cross-functional teams** delivering **mission-critical, military-grade systems** under high-pressure timelines.
- **Owned full lifecycle delivery** of complex technical equipment using structured Agile methodologies.
- **Coordinated international technical teams**, including collaboration with Chinese NORINCO engineers on large-scale installations.
- **Led large-scale operational exercises**, managing **30+ technical personnel** in time-critical environments.

## Certifications

---

- Agile Project Management (Kick-off) – PMI
- Fundamentals of Predictive Project Management (Kick-off) – PMI
- Generative AI for Project Managers – PMI
- No Code AI Agent Builder (n8n)
- Project Management Professional (PMP) - In Progress

## Projects

---

**Hail - Ride-Hailing Application (Stripe Integration) , USA** 2025

- **Owned end-to-end delivery** of a ride-hailing application similar to inDrive, from scope definition through final launch preparation.
- **Defined MVP scope**, architecture, and delivery roadmap, coordinating engineers across frontend, backend, and mobile components.
- **Integrated Stripe payments** for secure ride payments and platform monetization.
- **Currently in final stages of delivery**, with production launch scheduled for **late January 2026**.

**Azure DevOps Project Management – Power Platform Delivery, Australia** 2025

- **Owned end-to-end delivery** of a custom Power Platform solution for an Australian client, from scope definition to **production release**.
- **Led a cross-functional team** of developers and QA engineers, setting sprint structure, priorities, and delivery milestones in Azure DevOps.
- Implemented CI/CD pipelines, version control, and automated testing to ensure **deployable releases**.
- **Acted as the primary interface** between client stakeholders and the engineering team, translating business requirements into executable technical tasks and resolving blockers proactively.
- **Delivered a production-ready solution** with structured UAT, live deployment, and post-launch monitoring.

**Simply CRM - SaaS Platform Enhancements, Denmark** 2025

- **Owned end-to-end delivery** of CRM feature upgrades and a UI transition for a **live SaaS product**.
- **Defined technical scope**, sprint structure, and delivery timelines across multiple releases.
- **Managed engineers**, validated data integrity, and ensured **production-ready deployments**.
- **Delivered on-time launches**, improved usability, and achieved **measurable data quality improvements**.

## Skills

---

- End-to-End MVP & SaaS Delivery Ownership
- CTO-Level Technical Decision Making
- MVP Scoping & Architecture Planning
- Multi-Project & Engineer Management
- Agile Execution (Sprints, Demos, Releases)
- Founder & Stakeholder Communication

## Tools & Technologies

---

- GitHub Projects & Repositories
- Notion (Scoping & Documentation)
- Slack (Team & Client Communication)
- Figma (Design Review & Flows)
- Azure DevOps / Jira (Sprint & Delivery Tracking)
